EDUCATION

The Ohio State University

Bachelor of Science in Computer Science & Engineering

- Honors Engineering Program | GPA: 3.9/4.0

Columbus, OH

Sep. 2024 – Dec. 2027

EXPERIENCE

Software Engineering Intern

Aug. 2026 – Present

Wahed

Remote

- Developed iWaqf, a production full-stack charitable-endowment platform, with a team of four interns
- Partnered with Wahed engineers and the founder to translate requirements into shipped frontend and backend features

Software Engineering Co-op

May 2026 – Aug. 2026

American Honda Motor

Raymond, OH

- Consolidated two Python data pipelines onto a centralized server and PostgreSQL database, simplifying Power BI reporting across 100K+ license records
- Automated crane inspections with Power Apps and Power Automate, reducing paperwork by 80%
- Automated AWS Bedrock API key provisioning and per key usage tracking, reducing provisioning time by 90% and enabling cost attribution in Power BI
- Built a full-stack AI analytics assistant that translated natural-language questions into read-only SQL queries for license usage and cost analysis, visualizing results with interactive charts

AI Software Engineering Intern

May 2025 – Jul. 2025

EZO Solution

Austin, TX

- Developed and deployed a RAG-based AI chatbot using embeddings and vector search for domain-specific Q&A
- Optimized semantic retrieval and prompting, achieving 98% response accuracy on a 50-question evaluation set
- Integrated PaddleOCR into the document pipeline, enabling users to query using documents and images

PROJECTS

Study Studio LMS | *Next.js, TypeScript, Supabase, Anthropic, Stripe, Capacitor*

Jun. 2026 – Present

- Built and launched an AI-powered full-stack learning management system
- Engineered AI study tools using Anthropic for quiz and practice material generation and context-aware Q&A across course content
- Built core LMS workflows including assignments, grading, attendance, student notes, and real-time multiplayer quizzes
- Shipped the platform across web, iOS, and Android with Stripe payments, push notifications, and releases on the App Store and Google Play

Smart Home Automation | *Embedded Systems, IoT, MQTT, YAML, Linux*

Jun. 2022 – Jul. 2024

- Converted a legacy home security system into a smart, networked solution using an Arduino and Home Assistant
- Engineered a smart garage door opener with a microcontroller, relay, and reed switch
- Designed smart blinds and drawer locks using servo motors and NFC authentication, communicating over MQTT
- Developed a custom Linux-based smart speaker using Python scripts and cron jobs, automating recurring audio reminders

TECHNICAL SKILLS

Languages: Java, Python, C/C++, TypeScript, JavaScript, SQL, Swift, HTML/CSS

Frameworks: Next.js, React, React Native, Node.js, FastAPI, SwiftUI, Tailwind CSS

Technologies: PostgreSQL, Supabase, Cloudflare, AWS, Docker, Firebase, Stripe, Git, Linux, REST APIs

CERTIFICATIONS

HarvardX: CS50x - Introduction to Computer Science (*edX*)

2025

Google: Project Management Professional Certificate (*Coursera*)

2023
