EDUCATION

The Ohio State University

Columbus, OH

Bachelor of Science in Computer Science & Engineering

Expected Dec. 2027

- Honors Engineering Program | GPA: 3.9/4.0
- **Relevant Coursework:** Data Structures & Algorithms; Software Development & Design (Java); Low-Level Programming (C/Assembly); Operating Systems and Database Systems (in progress)

EXPERIENCE

Software Engineering Intern

Aug. 2026 – Present

Wahed

Remote

- Built iWaqf, a full-stack platform that helps users create and fund charitable endowments, on a four-intern team
- Implemented user validation, Stripe payments, endowment-creation workflows, and a legacy database migration; deployed a test release ahead of public launch

Software Engineering Co-op

May 2026 – Aug. 2026

American Honda Motor

Raymond, OH

- Centralized two scheduled Python pipelines on a shared server with PostgreSQL, adding validation, retries, and logging; processed 100K+ license records for analysis in Power BI
- Built a production AWS Bedrock analytics assistant that converted license and cost questions into SQL and charts, enforcing topic scope with parser-validated SELECT queries, table allowlists, a read-only PostgreSQL role, and query limits
- Automated AWS Bedrock API-key provisioning and per-key usage tracking with least-privilege IAM and secure credential lifecycle controls, cutting setup time by 90% and enabling cost attribution

AI Software Engineering Intern

May 2025 – Jul. 2025

EZO Solution

Austin, TX

- Developed and deployed a RAG chatbot using embeddings, vector search, and PaddleOCR for domain-specific Q&A over documents and images
- Optimized semantic retrieval and prompting, achieving 98% response accuracy on a 50-question evaluation set

Full-Stack Developer

Aug. 2024 – May 2025

Cybersense

Dublin, OH

- Built cross-platform real-estate search and matching interfaces with React Native for Android and SwiftUI for iOS
- Developed and documented FastAPI REST endpoints for authentication, user profiles, and property queries backed by Supabase PostgreSQL

PROJECTS

Study Studio LMS | *Next.js, TypeScript, Supabase, Anthropic, Capacitor*

Jun. 2026 – Present

- Launched an LMS for instructors and students on web, iOS, and Android, with releases on the App Store and Google Play
- Engineered real-time multiplayer quizzes with synchronized timers and handling for reconnects, late joins, and duplicate submissions across clients
- Enforced teacher, student, and administrator permissions and class isolation using Supabase Row Level Security; scoped AI retrieval to authorized course content
- Secured Stripe webhooks with signature verification and duplicate-event protection; added automated tests, GitHub Actions CI/CD, rate limiting, and error monitoring

Smart Home Automation | *Arduino, Python, MQTT, Home Assistant, Linux*

Jun. 2022 – Jul. 2024

- Networked a legacy home security system, garage door, motorized blinds, and NFC-authenticated locks through Arduino, Home Assistant, and MQTT
- Built a Linux-based smart speaker using Python and cron jobs to automate recurring audio reminders

TECHNICAL SKILLS

Languages: Java, Python, C, C++, TypeScript/JavaScript, SQL, Swift

Frameworks: Next.js, React, React Native, Node.js, FastAPI, SwiftUI, Tailwind CSS

Technologies: PostgreSQL, Supabase, Cloudflare, AWS, Docker, Firebase, Stripe, Git/GitHub Actions, Linux
